Client: FORD MOTOR COMPANY

Project Role: Test Engineer

(August 2022 - present)

- Collaborated with client's team to ensure the successful implementation and testing of software builds.
- Conducted flashing of the ECUs with new builds and executed test commands to validate the functionality.
- Analyzed test reports, identified issues, and performed troubleshooting to resolve any failures.
- Utilized logs files to analyze the cause of test failures, thoroughly investigating error messages and system behavior to identify root causes.
- Worked with PuTTY for remote server access and configuration.
- Managed test cases and test execution using TestRails, ensuring comprehensive test coverage.
